

GJB2 Antibody

Catalog No: #36893

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	GJB2 Antibody
Host Species	Rabbit
Clonality	Polyclonal
Purification	Antigen affinity purification.
Applications	IHC
Species Reactivity	Hu
Specificity	The antibody detects endogenous levels of total GJB2 protein.
Immunogen Type	Peptide
Immunogen Description	Synthetic peptide corresponding to residues near the C terminal of human gap junction protein, beta 2, 26kDa
Target Name	GJB2
Other Names	HID; KID; PPK; CX26; DFNA3; DFNB1; NSRD1; DFNA3A; DFNB1A
Accession No.	Swiss-Prot#: P29033NCBI Gene ID: 2706Gene Accssion: NP_003995
Uniprot	P29033
GeneID	2706;
Concentration	4.6mg/ml
Formulation	Rabbit IgG in pH7.4 PBS, 0.05% NaN ₃ , 40% Glycerol.
Storage	Store at -20°C

Application Details

Immunohistochemistry: 1:100-1:300

Images

Immunohistochemical analysis of paraffin-embedded Human esophagus cancer tissue using #36893 at dilution 1/100.

Background

This gene encodes a member of the gap junction protein family. The gap junctions were first characterized by electron microscopy as regionally specialized structures on plasma membranes of contacting adherent cells. These structures were shown to consist of cell-to-cell channels that facilitate the transfer of ions and small molecules between cells. The gap junction proteins, also known as connexins, purified from fractions of enriched gap junctions from different tissues differ. According to sequence similarities at the nucleotide and amino acid levels, the gap junction

proteins are divided into two categories, alpha and beta. Mutations in this gene are responsible for as much as 50% of pre-lingual, recessive deafness.

Note: This product is for in vitro research use only
