

Recombinant Human CXCR6

Catalog No: #GP11411

Package Size: #GP11411-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human CXCR6
Brief Description	Recombinant Protein
Host Species	E.coli
Purification	>85%, as determined by Coomassie blue stained SDS-PAGE.
Immunogen Description	Fusion protein corresponding to a region derived from 260-342 amino acids of human chemokine (C-X-C motif) receptor 6
Target Name	chemokine (C-X-C motif) receptor 6
Other Names	BONZO; CD186; STRL33; TYMSTR
Accession No.	Swissprot:O00574Gene Accession:BC033584
Uniprot	O00574
GeneID	10663;
Storage	-20~-80°C, pH 7.6 PBS

Background

?Bonzo (also designated STRL33.3) and BOB (brother of Bonzo; also designated GRP15) are seven-transmembrane, G protein-coupled receptors that are closely related to chemokine receptor family members. In conjunction with CD4, several chemokine receptors are known to serve as receptors for HIV-1 entry into cells. Bonzo and BOB are utilized by simian immunodeficiency virus (SIV), HIV-2 and M-tropic HIV-1 for cell entry. Bonzo and BOB are both expressed in lymphoid tissues, and BOB is also expressed in colon.
