Product Name MEF2a(Phospho-Thr319) Antibody Host Species Rabbit Clonality Polyclonal Purification Antibodies were produced by immunizing rabbits with synthetic phosphopeptide and KLH conjugates Antibodies were purified by affinity-chromatography using epitope-specific phosphopeptide. Non-phosphopeptide and KLH conjugates Antibodies were purified by affinity-chromatography using epitope-specific phosphopeptide. Non-phosphopeptide and KLH conjugates Antibodies were removed by chromatogramphy using non-phosphopeptide. Applications IF Species Reactivity Hu Ms Rt Specificity The antibody detects endogenous level of MEF2A only when phosphorylated at Thr319. Immunogen Type Peptide-KLH Immunogen Description Peptide sequence around phosphorylation site of Thr319 (V-T-T(p)-P-S) derived from Human MEF2A			
Clonality Polyclonal Purification Antibodies were produced by immunizing rabbits with synthetic phosphopeptide and KLH conjugates Antibodies were purified by affinity-chromatography using epitope-specific phosphopeptide. Purification Antibodies were produced by immunizing rabbits with synthetic phosphopeptide and KLH conjugates. Antibodies were purified by affinity-chromatography using epitope-specific phosphopeptide. Non-phosphopeptide. Applications IF Species Reactivity Hu Ms Rt Specificity The antibody detects endogenous level of MEF2A only when phosphorylated at Thr319. Immunogen Type Peptide-KLH			
Antibodies were purified by affinity-chromatography using epitope-specific phosphopeptide. Non-phosphopeptide. Applications IF Species Reactivity Hu Ms Rt Specificity The antibody detects endogenous level of MEF2A only when phosphorylated at Thr319. Immunogen Type Peptide-KLH			
specific antibodies were removed by chromatogramphy using non-phosphopeptide. Applications IF Species Reactivity Hu Ms Rt Specificity The antibody detects endogenous level of MEF2A only when phosphorylated at Thr319. Immunogen Type Peptide-KLH	Antibodies were produced by immunizing rabbits with synthetic phosphopeptide and KLH conjugates.		
Applications IF Species Reactivity Hu Ms Rt Specificity The antibody detects endogenous level of MEF2A only when phosphorylated at Thr319. Immunogen Type Peptide-KLH	pho		
Species Reactivity Hu Ms Rt Specificity The antibody detects endogenous level of MEF2A only when phosphorylated at Thr319. Immunogen Type Peptide-KLH			
Specificity The antibody detects endogenous level of MEF2A only when phosphorylated at Thr319. Immunogen Type Peptide-KLH			
Immunogen Type Peptide-KLH			
Immunogen Description Peptide sequence around phosphorylation site of Thr319 (V-T-T(p)-P-S) derived from Human MEF2A			
	-		
Target Name MEF2a			
Modification Phospho			
Other Names MEF2; Serum response factor-like protein 1;			
Accession No. Swiss-Prot: Q02078NCBI Protein: NP_001124398.1			
Uniprot Q02078			
GenelD 4205;			
Concentration 1.0mg/ml			
Formulation Supplied at 1.0mg/mL in phosphate buffered saline (without Mg2+ and Ca2+), pH 7.4, 150mM NaCl,).02%		
sodium azide and 50% glycerol.			
Storage Store at -20°C for long term preservation (recommended). Store at 4°C for short term use.			

Application Details

Predicted MW: 54kd

Immunofluorescence: 1:100~1:200

Images

Immunofluorescence staining of methanol-fixed Hela cells using MEF2A(Phospho-Thr319) Antibody #11040.

Background

The process of differentiation from mesodermal precursor cells to myoblasts has led to the discovery of a variety of tissue-specific factors that regulate muscle gene expression. The myogenic basic helix-loop-helix proteins, including myoD (MIM 159970), myogenin (MIM 159980), MYF5 (MIM 159990), and MRF4 (MIM 159991) are one class of identified factors. A second family of DNA binding regulatory proteins is the myocyte-specific enhancer factor-2 (MEF2) family. Each of these proteins binds to the MEF2 target DNA sequence present in the regulatory regions of many, if not all, muscle-specific genes. The MEF2 genes are members of the MADS gene family (named for the yeast mating type-specific transcription factor MCM1, the plant homeotic genes 'agamous' and 'deficiens' and the human serum response factor SRF (MIM 600589)), a family that also includes several homeotic genes and other transcription factors, all of which share a conserved DNA-binding domain
