

fumarate hydratase antibody

Catalog No: #22079

Orders: order@signalwayantibody.com
Support: tech@signalwayantibody.com

Description

Product Name	fumarate hydratase antibody
Host Species	Rabbit
Clonality	Polyclonal
Purification	Purified by antigen-affinity chromatography.
Applications	WB IHC IF
Species Reactivity	Hu
Immunogen Type	Recombinant protein
Immunogen Description	Recombinant protein fragment contain a sequence corresponding to a region within amino acids 89 and 335 of fumarate hydratase
Target Name	fumarate hydratase
Accession No.	Swiss-Prot:P07954Gene ID:2271
Uniprot	P07954
GeneID	2271;
Concentration	1mg/ml
Formulation	Supplied in 0.1M Tris-buffered saline with 10% Glycerol (pH7.0). 0.01% Thimerosal was added as a preservative.
Storage	Store at -20°C for long term preservation (recommended). Store at 4°C for short term use.

Application Details

Predicted MW: 55kd
Western blotting: 1:500-1:3000
Immunohistochemistry: 1:100-1:500
Immunofluorescence: 1:100-1:200

Images

Sample (30 ug of whole cell lysate)
A: 293T
B: A431
10% SDS PAGE
Primary antibody diluted at 1: 5000

Immunohistochemical analysis of paraffin-embedded OVCAR3 xenograft, using fumarate hydratase antibody at 1: 500 dilution.

Costained with Hoechst 33342

Immunofluorescence analysis of methanol-fixed HeLa, using Fumarate hydratase antibody at 1: 200 dilution.

Background

The protein encoded by this gene is an enzymatic component of the tricarboxylic acid (TCA) cycle, or Krebs cycle, and catalyzes the formation of L-malate from fumarate. It exists in both a cytosolic form and an N-terminal extended form, differing only in the translation start site used. The N-terminal extended form is targeted to the mitochondrion, where the removal of the extension generates the same form as in the cytoplasm. It is similar to some thermostable class II fumarases and functions as a homotetramer. Mutations in this gene can cause fumarase deficiency and lead to progressive encephalopathy.
